# Basic Manual/A1402S

# Welcome

Thank you for buying the A1402S.

Before using your A1402S, be sure to read the A1402S Basic Manual (PDF manual) to ensure correct use of your A1402S. After you have finished reading this manual, store this PDF manual and the printed manuals in a safe place so you can retrieve them whenever you need them.

If you lose any of these manuals, contact our service representative.

## Printed manuals for A1402S (Japanese)

The A1402S comes with the Basic Manual and the Manual.

This Basic Manual and the Manual can be downloaded also from the au website.

au website: <http://www.au.kddi.com/>

### A1402S Basic Manual

Equivalent to this PDF manual.

### A1402S Manual

English version is not available.

In some of the displays used for descriptions in this manual, the icon display area at the top of the display and the soft key option display area at the bottom of the display may be omitted. Also, the typeface and shape of fonts used in displays may differ from those used in actual displays or may be omitted.

# Etiquette

## Cellphone etiquette

- Cellphones emit weak radio waves at all times even if you just turn the power on.
- Enjoy and safely use your cellphone without forgetting those around you.

### ● Some places forbid the use of cellphones.

- Do not use cellphones while you are driving. Doing so is dangerous and forbidden by law.
- Radio waves may interfere with airplane operation. Be sure to turn your cellphone off before you board airplanes.

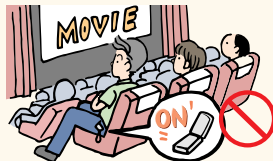

### ● Radio waves from cellphones may adversely influence medical apparatus and equipment.

- Some people close to you in busy places such as crowded trains may be using pacemakers. Turn your cellphone off in such places.
- Abide by the instructions of hospitals and other medical institutions where it is forbidden to use or carry cellphones.

### ● Consider where to use your cellphone and be careful of how loudly you talk.

- Do not make calls from cinemas, theaters, museums, libraries and other similar places. Turn your cellphone off or set it to the manner mode to prevent others around you from being inconvenienced by the incoming ring.

- Use your cellphone in places where you do not prevent others from passing through.
- Move to areas where you do not cause others inconvenience on trains or in hotel lobbies.
- Take care not to talk too loudly during conversations.

- Get other people's permission before you start taking photos with the cellphone's camera.

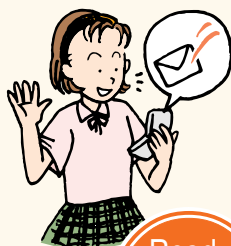

# Basics of the cellphone

## What A1402S offers

### Mail

You can send mail to other cellphones or PCs.

Read from page **34**

### Phone calls

Your cellphone is full of handy functions like a phone book, call list, and manner mode.

Read from page **18**

### EZweb (Internet)

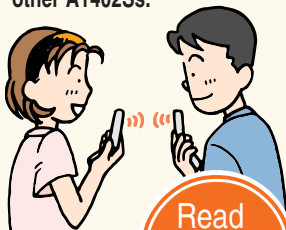

You can view news, or download incoming melodies or wallpaper.

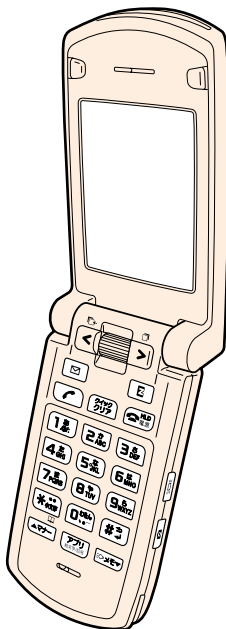

Read from page **64**

### Infrared data exchange

You can send and receive data, like phone book entries and profiles, to and from other A1402Ss.

Read from page **72**

### Camera

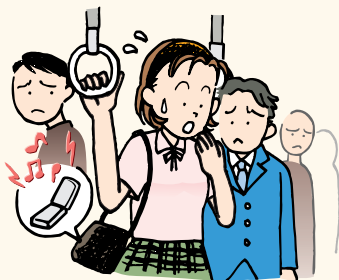

You can easily take photos and send them by e-mail.

Read from page **54**

## Manner mode, record message, and keypad lock

### Manner mode – For turning sound off

You can use the manner mode to turn incoming rings and other tones off to prevent others from being inconvenienced.

Hold down  for at least one second in the idle display.

See  
page **25**

### Record message – When you cannot answer a phone call

You can play answer messages and record messages from other parties when you cannot answer a phone call.

Hold down  for at least one second in the idle display.

See  
page **26**

### Keypad lock – For preventing keypad misoperation

You can lock the keypad to prevent keypad misoperation, for example, when carrying your cellphone with the power turned on. This can prevent mistaken calls even if a small child plays with your cellphone.

Hold down  for at least one second in the idle display. To unlock the keypad, hold down  for at least one second in the idle display. You can lock or unlock the keypad by pressing  (shutter key) for at least one second with the main unit folded in when the main display is in the idle display.

## Check the power, radio waves, and battery!

Usually, keep the cellphone's power on.

To make or receive calls, turn the power on.

Hold down  for at least one second.

See  
page 11

You cannot talk if you are not receiving "radio waves."

It is sometimes difficult to receive radio waves in some places even in service areas.

 indicates the reception state.

See  
page 11

Pay attention to the remaining "battery" power.

Sometimes the cellphone does not function properly if the remaining battery power is low.

 indicates the remaining battery power.

See  
page 11

## Watch out for spam and one-ring calls!

### If you get incoming spam...

You can use the mail filter function to disable reception of just mail you specify or block mail indicated as "未承諾広告※" that contains lots of spam.

#### E-mail

The following mail functions are available for preventing arrival of spam:

- "未承諾広告フィルター": To block spam
- "アドレスフィルター": To filter various addresses

"指定拒否設定": To reject specified mail

"指定受信設定": To receive only specified mail

"なりすまし規制": To block mail from a spammer who pretends to be using a cellphone or PHS

#### C-mail

- Receive filter

See  
page 48

### If you have an incoming call from an unknown number...

Such calls may be an invitation to you to return a call to services with very high charges. (This is a "one-ring call.")

The red icon  is displayed in the Received display when you receive a one-ring call.

# How to use mail

## Using e-mail

You need to subscribe to the EZweb (Internet) service to use the e-mail service.

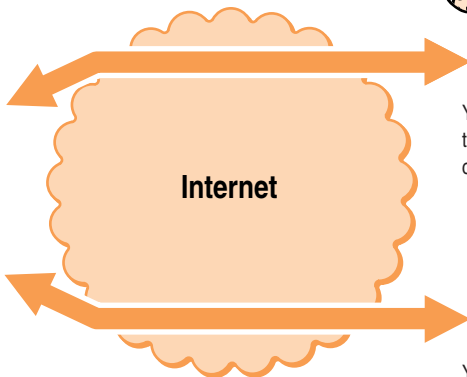

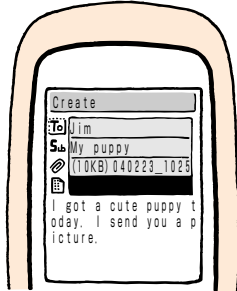

Contact an au Customer Service Center or an au shop if you did not subscribe to the service at the time of purchase.

Be sure to do initial settings before using the e-mail and EZweb services.

If you have not done initial settings yet, see page 16.

The e-mail service allows you to exchange mail with PCs or cellphones that support e-mail using Internet e-mail addresses. Besides being able to send mail comprising up to 5,000 double byte characters, you can also send photos and movies.

An e-mail is sent to an e-mail address.  
(Example)  $\Delta\Delta\Delta@□□□.ne.jp$

You can also send e-mail to au and other cellphones.

You can also send e-mail to PCs.

## Filtering spam

### Setting the mail filter

The mail filter function allows you to block spam or set the A1402S to receive only specified mail. You can also block mail indicated as "未承諾広告※" that contains lots of spam.

Follow the procedure below to use the mail filter function.

- ① Press  (mail) in the idle display, and use  and  to select "Settings" → "Etc. setting."
- ② Use  and  to select "Yes" → "3 メールフィルター," and input your security code.

The mail filter function contains the following functions.

#### 未承諾広告フィルター

This filter allows you to block mail containing "未承諾広告※" in its subject.

#### アドレスフィルター

"全受信": All e-mail is received.

"指定受信設定":

- "一括指定先" This specifies Internet and cellphone domains, and receives only e-mails that arrive from those domains.
- "個別指定" This specifies the section preceding @, the domain or the entire e-mail address, and receives only those specified e-mails.

"指定拒否設定": This specifies the section preceding @, the domain or the entire e-mail address, and blocks only those specified e-mails.

"なりすまし規制": This filters e-mail from a spammer who pretends to be using a cellphone or a PHS when you set "全受信" and "規制する" simultaneously.

By changing your e-mail address, you can prevent spam from being received.

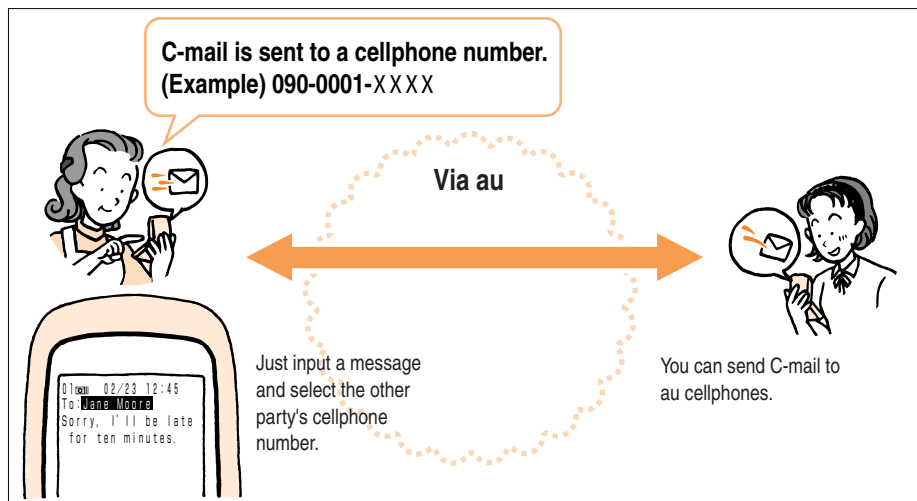

To change your e-mail address, see page 35.

C-mail also provides a function to block spam.

## Using C-mail

C-mail is a service that allows you to exchange mail with other au cellphones that support C-mail using cellphone numbers. You can send mail comprising up to 50 double byte characters by C-mail.

 You can use C-mail without having to make any special applications in the Metropolitan area or the Chubu District. Users contracted in other areas must apply separately to use the C-mail service.

## Creating and sending C-mail

- 7** When downloading finishes, press  (play) to play back the incoming melody, and press  (save) while the incoming melody is playing.

⇒ The Save to display appears.

- 8** Turn  to select "Phone ring tone," and press  (select).

⇒ The downloaded incoming melody is specified as an incoming ring.

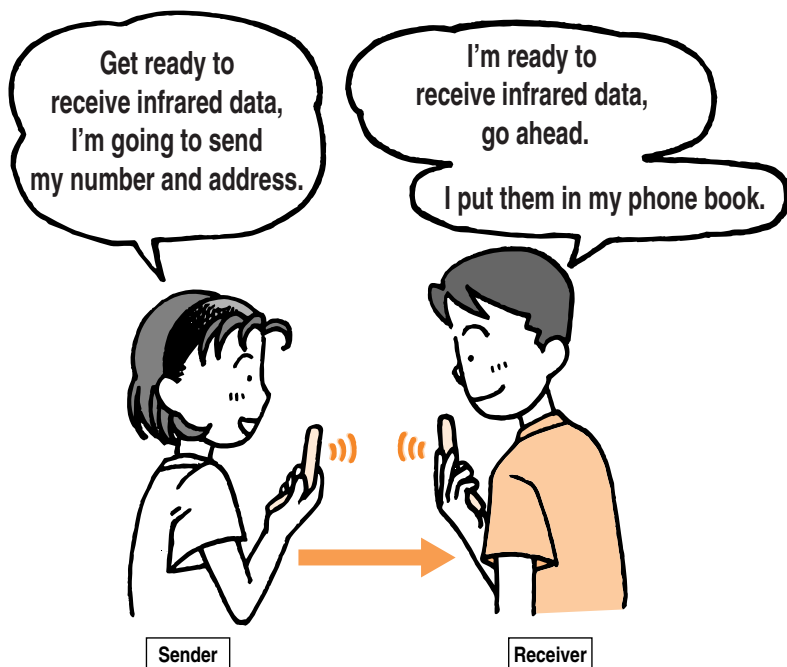

# How to use the infrared data exchange feature

You can use the infrared data exchange feature of your A1402S to send and receive phone book entries, profile data, data in data folders, and other data to and from other A1402Ss.

## Using the infrared data exchange feature

To send data with the infrared data exchange feature, both the person sending and the person receiving the data need to make preparations.

(We recommend that the person receiving data get ready before the sender sends the data.)

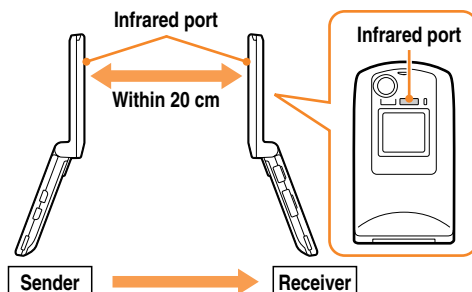

※ For details on sending data, see page 74.

※ For details on receiving data, see page 75.

## Procedure

Use your A1402S within 20 cm of another A1402S. Also, keep your A1402S pointed at the infrared port of the other A1402S and do not move your A1402S until data has finished being sent or received.

## Data that can be sent and received

- Phone book entries
- Profiles
- Schedules
- Task lists
- Data in data folders

 You cannot send or receive some data from some A1402Ss even if the other A1402S you are communicating with is equipped with the infrared data exchange feature.

 The infrared data exchange feature of the A1402S sometimes does not transmit properly if the A1402S is used in direct sunlight, under fluorescent lighting or near other equipment that emits infrared rays.

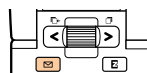

# Using the infrared data exchange feature to send data

Example: To send profile data

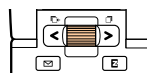

- 1 Press  (menu) in the idle display, and press  .
- ⇒ The profile display appears.

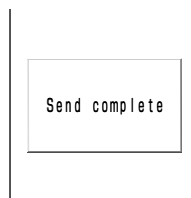

- 2 Press  (option).
- ⇒ The Function menu appears.

- 3 Turn  to select "send Ir data," and press  (select).
- ⇒ Data is sent through the infrared data exchange feature.

 When sending finishes, the display on the right appears.

 You may be required to input your authentication password.

## Using the infrared data exchange feature to receive data

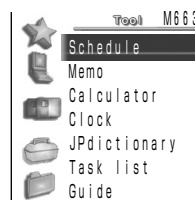

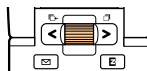

- 1 Press  (menu) in the idle display.

⇒ The Index menu appears.

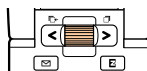

- 2 Turn  to select  (Tool), and press  (select).

⇒ The Tool menu appears.

- 3 Turn  to select "Rcv Ir data," and press  (select).

⇒ Data is received through the infrared data exchange feature.

 When receiving finishes, a message is displayed and the data is saved.

 You may be required to input your authentication password.

# Inputting text

## Changing the character mode

Input text using characters from the 11 character modes.

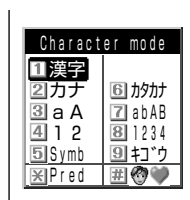

- |                                 |                                 |
|---------------------------------|---------------------------------|
| 1 Kanji/Hiragana mode           | 6 Single byte katakana mode     |
| 2 Double byte katakana mode     | 7 Single byte alphanumeric mode |
| 3 Double byte alphanumeric mode | 8 Single byte number mode       |
| 4 Double byte number mode       | 9 Single byte symbol mode       |
| 5 Double byte symbol mode       | # E moji mode                   |
| * Phrase mode                   |                                 |

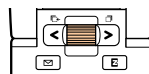

- 1 Press **E** (mode) in the text input display.

⇒ The Character mode display appears.

- 2 Turn to select the character mode, and press (select).

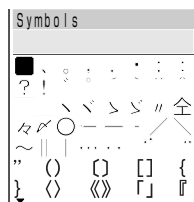

⇒ You can now input text in the selected character mode.

The character mode can also be changed by pressing

**E** (next), **1** , to **9** , **\*** , or **#** in the character mode display.

## Inputting text

You can use this feature to input data such as e-mail addresses and e-mail messages. Change the character mode and select alphanumerics such as **3**aA or **7**abAB. For details on how to change the character mode, see page 76.

In the text input display, you can input text by pressing the keys indicated in the following table.

[illegible]

■ Character key assignment table (single byte alphanumerics)

	Number of times to press the key												
Key	1	2	3	4	5	6	7	8	9	10	11	12	13

# Other features

The A1402S has other handy features in addition to those introduced in this Basic Manual.

## Menu design settings

You can select a pattern for the menu display. You can also set the pattern data you downloaded.

## Idle display settings

You can set a photo taken by the A1402S or other image as the idle display. You can also select your favorite image for the idle display of the quick display.

## Incoming indicator settings

You can make and set the color and flashing pattern of an incoming indicator when you have an incoming call or mail.

## EZ "着うた™"

This service allows you to set an artist's song as an incoming ring.

## PhotoMixer

You can create your own original works by adding images or text to pre-set, melody-attached animation templates.

## EZ application (BREW™)

You can download game software from EZweb (Internet) sites and play games. 2D CODE READER and Infrared Remote Controls, for example, are also available.
